DEVOPS ENGINEER / WEB DEVELOPER

Diyan Yanev

+359 895290605   diyanpetrov61@gmail.com   Sofia, Bulgaria

I am very motivated person, a fast learner, open to new technologies and opportunities. I am both excellent at team and independent work. I work well under pressure and find myself as a communicative person. I am always looking for the most effective solutions on tasks and issues that come up in the work environment. I have faced composite tasks without hesitation and have always achieved the desired results no matter the obstacles.

PROJECTS

Personal Portfolio Website
● Built a Fully-Responsive FE-only Single Page Application using React and showcasing my current developer portfolio.
● Techologies: React, TypeScript, TailwindCSS, React-icons
Github Repository: https://github.com/DiyanPv/portfolio-website
Live Website Demo: **https://diyan-yanev.website/**

Food Stop
● A fully-responsive Single Page Application using React, the React Context API (forstoring cart items) instead of Redux and Firebase as the back-end (storing order data andfetching current sell-able products)
● Techologies: React, Firebase, React Router DOM
Github Repository:
https://github.com/DiyanPv/ReactDemos/tree/main/ReactFood
Website Demo: **https://diyan-test.web.app/**

Verius Marketplace
● Vite project using TailwindCSS for styling. Backend on Solidity (Goerli-only ready).Can be used to send transactions to another address + the contract created. Contract returns array of items + images generated from Giphy API, which are visualised at thebottom of the page. If not connected to Goerli, a dummy array of items will appear at thebottom. Navbar logic to be added, Login button is active.
● Techologies: Vite, Solidity, EthersJS, TailwindCSS, Hardhat, Mocha, Chai for testing
Github Repository: https://github.com/DiyanPv/VERIUS-Marketplace
Website Demo: https://verius-web3.vercel.app/

Expense Tracker
● An expense tracker with basic input fields like date/item/price. As soon as submitted, itlogs and displays the filtered array at the bottom for the specific year selected. There isalso a 12-month breakdown for each spending year.
● Techologies: React. Firebase for hosting/deployment.
Github Repository: https://github.com/DiyanPv/React-Demos/tree/main/my-app
Website Demo: https://expenses-track-react.web.app/

Invaders 2.0
● A basic Javascript/HTML/CSS shooter game with random moving spawnable targets.Deployment using Firebase
Github Repository: https://github.com/DiyanPv/sidescrolling-game-JS
Website Demo: https://invaders-2-0.web.app/

SKILLS

Languages: English, Russian, Bulgarian

DevOps:
·Jenkins·Docker·Kubernetes·AWS ·Ansible ·Linux ·Terraform, Azure, Grafana, Prometheus, etc.

Back-End Development:
·ExpressJS·MongoDB·MySQL·Firebase·Node.js

Front-End Development: ·React·React Native·NextJS·PrimeReact·ChakraUI·TailwindCSS ·Sass·Vite·Redux·Axios·HTML5·CSS3

Version Control: Git

ADDITIONAL

-Fast decision-making
-Adaptability
-Attentive Listening-
Calm problem solving
-Proactive help in other various tasks(helping other team members, management, etc.)
-Strong desire to grow professionally

EXPERIENCE

Zagora Eco OOD - Assistant Manager
(2013-2020)

It is a family business based in the poultry (egg production) sector. I was effectively an all-in-one person, able to manage every task and replace people in sick leave or maintenance/construction and managing every process (microclimate, food portions, water resources, etc. Good knowledge of different types of machinery, constructions, electricity circuits.

Krypt
● A fetching service that uses the CryptoCompare library to fetch data from different exchanges dynamically. Users can also sort the prices in ascending/descending order and can also fetch data by going to www.url.com/{cryptoPair} and www.url.com/{cryptoPair}/details
Github Repository: https://github.com/DiyanPv/krypt-fe
Live Website Demo: https://krypt-fe.vercel.app/

CERTIFICATIONS

SoftUni: **Containers and Cloud**| Docker, Grafana, Prometheus, Terraform, Microsoft Azure - TBD

Udemy: **DevOps** | AWS, Linux, Terraform, Jenkins, Ansible, Docker,Kubernetes

FreeCodeCamp: **Data Structures** and Algorithms

Udemy: **Web Developer** Bootacamp - Colt Steele

SoftUni: **Javascript** Basics/Fundamentals/Advanced/Application

Udemy: **NodeJS** - The Complete Guide

Udemy: **React** - The Complete Guide

FreeCodeCamp: **Responsive** Web Design

Sitel - CSR
(2019-2021)

· Managing tasks and time effectively
· Daily discussions with restaurant owners
· Troubleshooting generic or specific inquiries
· Decision-making in regards to company compensation policies
· Making weekly reports and assisting newer colleagues

Nexo - CSR
(2021-now)

· Great platform knowledge and knowledge in all Nexo-related products
· User administration· Processing documentation and following strict processes
 ·Understanding issues and finding solutions in a timely manner
·Discussions with multiple departments about a variety of topics on a daily basis
